Simple shapes. Playful possibilities.

The approved Tangram, with an organic cloud of bubbles and three vivid colors.

Triangle / rectangle / curved bowl / bubbles

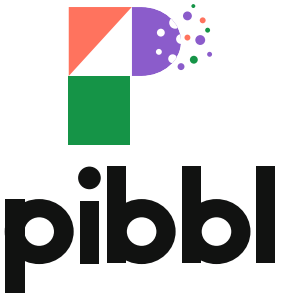
The mark combines geometric composition with a playful particle release. Preserve the shape geometry, approved colors, interior cutouts and fixed bubble positions; the cloud is designed to feel organic.

Four core colors

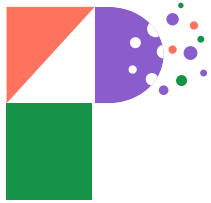
A lockup for every space.

Use one consistent mark across wide, tall, compact and text-only placements.

Primary / websites, decks and headers



Stacked / centered and square placements



Icon / avatars, apps and favicons

Wordmark / supporting identity

Color and lettering.

Flat source colors and a wordmark that travels without a font dependency.

CORAL

#FF735E / RGB 255 115 94

CMYK approx. 0 / 55 / 63 / 0

GREEN

#159447 / RGB 21 148 71

CMYK approx. 86 / 0 / 52 / 42

VIOLET

#8B5CCB / RGB 139 92 203

CMYK approx. 32 / 55 / 0 / 20

INK

#111211 / RGB 17 18 17

CMYK approx. 6 / 0 / 6 / 93

WHITE

#FFFFFF / RGB 255 255 255

CMYK approx. 0 / 0 / 0 / 0

DARK

#141820 / RGB 20 24 32

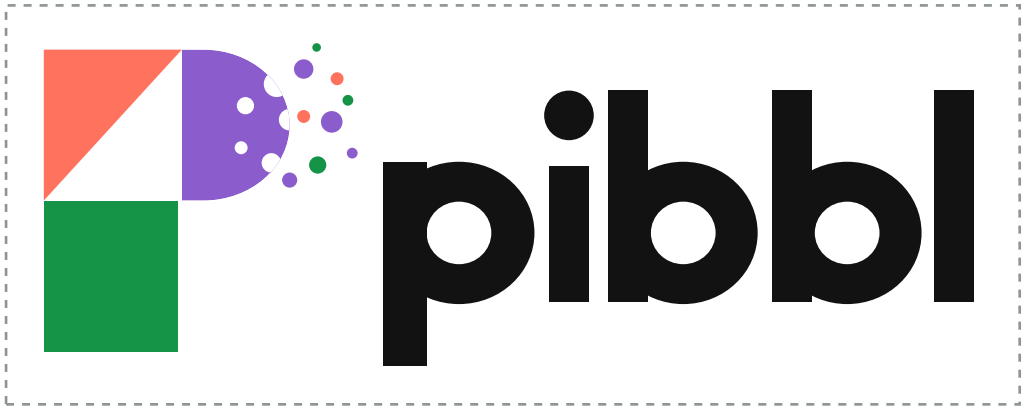
CMYK approx. 38 / 25 / 0 / 87

The logo lettering is custom geometric artwork.

All SVG lettering is outlined. Keep the lowercase pibbl artwork intact; use a readable sans serif for surrounding copy. CMYK values are conversion starting points: ask your printer to proof the intended stock and color profile.

Space, scale and contrast.

Preserve breathing room; use the simplified icon when bubble details become too small.



Keep at least 35 master units of space around the entire cloud.

Recommended minimum sizes

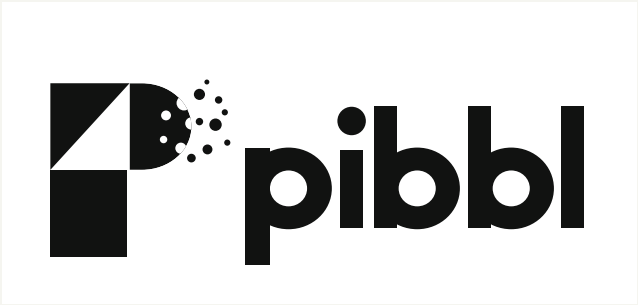
Full icon: 64 px high

Horizontal: 240 px wide

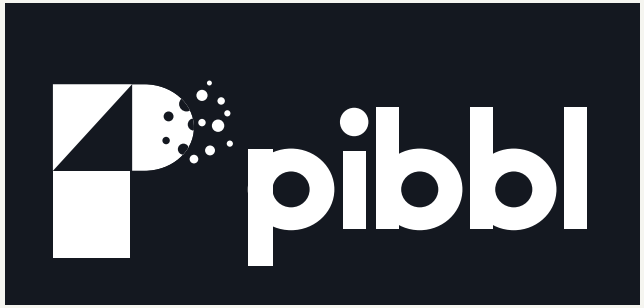
Stacked: 160 px wide

Wordmark: 100 px wide

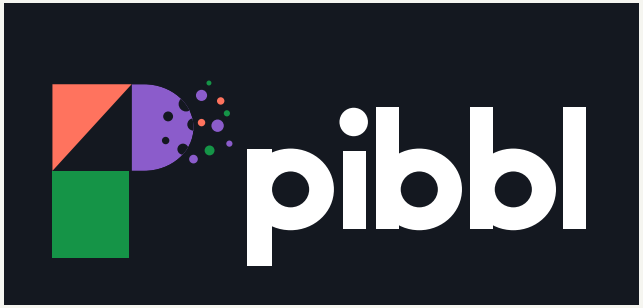
Solid Tangram favicon: 16 / 32 / 48 px.



One color / dark



One color / reversed



Full color / dark background

Keep proportions. Keep color order. Avoid shadows, outlines, recoloring and busy backgrounds.

Ready to use. Easy to hand off.

The kit includes vector masters, raster exports, marketing artwork and source files.

svg/	16 editable masters: horizontal, stacked, icon and wordmark.
png/	Transparent exports at multiple sizes, up to 4096 px wide.
print/	Vector PDF and EPS masters in all four colorways.
web/	Favicon SVG/ICO/PNG, touch/app icons, WebP and web manifest.
marketing/	Profiles, share cards, banners, slides, square posts, wallpaper, pattern, sticker artwork and an email signature logo.
animation/	Separate shapes, bubble assets, pivots and release positions.
source/	Identity specification, path artwork and reproducible export builders.

Using the files

Use SVG for websites and design tools, transparent PNG for slides and quick placement, and PDF/EPS for print workflows. White and color-on-dark logo files are transparent: place them on a dark background. Marketing exports include their background.

Animation plan: tumble solid shapes while loading, settle into the P, then release the bubbles.
Individual assets and exact geometry are included; the animation is not implemented.
