Simple shapes. A distinctive identity.

The selected Original Tangram, rebuilt as a dependable vector identity.

Triangle / square / curved bowl

The mark expresses building and composition through a small set of geometric pieces. Keep the silhouette, color order and proportions consistent across every use.

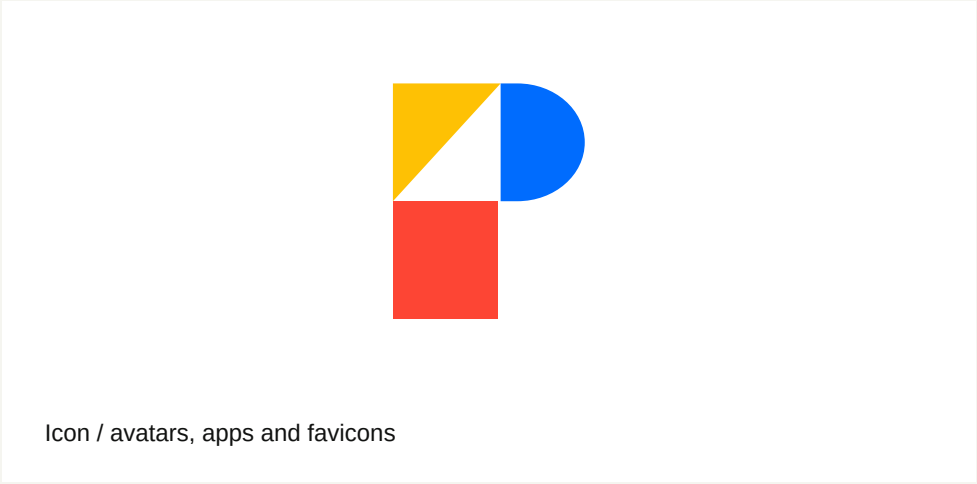
Four core colors

A lockup for every space.

Use one consistent mark across wide, tall, compact and text-only placements.

Primary / websites, decks and headers

Stacked / centered and square placements



Icon / avatars, apps and favicons

Wordmark / supporting identity

Color and lettering.

Flat source colors and a wordmark that travels without a font dependency.

BLUE

#006CFE / RGB 0 108 254

CMYK approx. 100 / 57 / 0 / 0

YELLOW

#FEC104 / RGB 254 193 4

CMYK approx. 0 / 24 / 98 / 0

CORAL

#FD4534 / RGB 253 69 52

CMYK approx. 0 / 73 / 79 / 1

INK

#111211 / RGB 17 18 17

CMYK approx. 6 / 0 / 6 / 93

WHITE

#FFFFFF / RGB 255 255 255

CMYK approx. 0 / 0 / 0 / 0

DARK

#141820 / RGB 20 24 32

CMYK approx. 38 / 25 / 0 / 87

The logo lettering is custom geometric artwork.

All SVG lettering is outlined. Keep the lowercase pibbl artwork intact; use a readable sans serif for surrounding copy. CMYK values are conversion starting points: ask your printer to proof the intended stock and color profile.

Space, scale and contrast.

Let the three shapes stay visible, even when the logo is small.

Built-in clear space = 1/8 of the mark height.

Recommended minimum sizes

Icon: 24 px high

Horizontal: 160 px wide

Stacked: 120 px wide

Wordmark: 100 px wide

16 px favicon supplied for browser use.

One color / dark

One color / reversed

Full color / dark background

Keep proportions. Keep color order. Avoid shadows, outlines, recoloring and busy backgrounds.

Ready to use. Easy to hand off.

The kit includes vector masters, raster exports, marketing artwork and source files.

svg/	16 editable masters: horizontal, stacked, icon and wordmark.
png/	Transparent exports at multiple sizes, up to 4096 px wide.
print/	Vector PDF and EPS masters in all four colorways.
web/	Favicon SVG/ICO/PNG, touch/app icons, WebP and web manifest.
marketing/	Profiles, share cards, banners, slides, square posts, wallpaper, pattern, sticker art, email logo and a motion SVG.
source/	Identity specification, path artwork and reproducible export builders.

Using the files

Use SVG for websites and design tools, transparent PNG for slides and quick placement, and PDF/EPS for print workflows. White and color-on-dark logo files are transparent: place them on a dark background. Marketing exports include their background.

The source raster concept is retained in reference/. Vector geometry and lettering are a clean reconstruction, with sampled flat colors replacing the concept shading.
